

The Role of High School Students in Nuclear Disarmament Education

Soka Senior High School

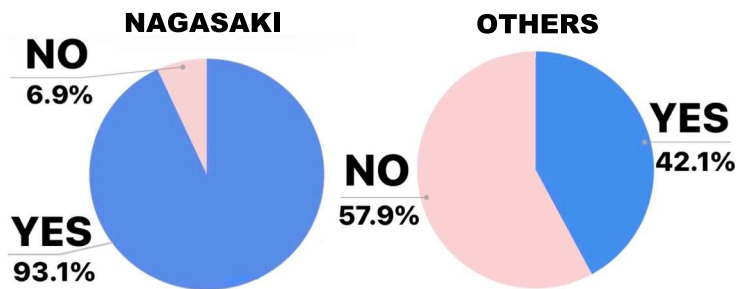

Current Situation

**Necessity for succession
by younger people.**

The Aging & Reduction
of Hibakusha

Research in Nagasaki

Q1. Have you received nuclear
disarmament education at school?

Difference in Opportunities

Q2. What did you learn in
the nuclear disarmament education?

Education in Nagasaki

- Peace assembly
- Educational field trip
- Every August 9th is school day
- Exhibition of nuclear damage in school

Education in other prefectures

- School trip
- Moral education

Difference in Quality

Suggestion

Visiting Class

→ To enclose the gaps and to succeed about atomic-bombs

The class we did in January

Participants:

High school students (**Teachers**) & Junior high school students (**Students**)

Contents:

The history of nuclear weapon & nuclear deterrence

Impression:

This class changed my opinion about nuclear weapons. I thought abstractly that nuclear weapons are dangerous and scary things before this class. Through this class, however, I learned about the danger of nuclear weapons, current situation, what we can do and understood nuclear deterrence. I will keep praying for peace now and pay attention to nuclear weapons deeply.
