# Application For Students  "ASSISTANT BOARD"

Oh, I have too many prints to organize! In addition, I sometimes lose them because of that.

A lot of educational applications have been developed, but they are all inadequate.

ASSISTANT BOARD can change this situation!

Contacts and assignments are displayed in one tab, so it's easy to see and remember!

It's an application designed by students, so it's full of features that we need!

---

## What can we do with ASSISTANT BOARD ?   ASSISTANT BOARD gives students endless possibilities.

Is there a task I have to do by tomorrow? There are so many assignments, I don't know which one is which!

In that case, how about the "NEWS" tab of our app?

Only necessary information for each student will be sent

NEWS
Information

I want to ask questions in class about things that I don't understand, but I'm too embarrassed to ask them.

In that case, how about the "FORMS" tab of our app?

FORMS
Ask For Teachers

You can ask questions at any time and as a result, your academic performance will improve.

Schedule

○ Equipped with essential timetable features for school life.

◎ ASSISTANT BOARD doesn't just show you the timetable, it also shows you what you've been preparing for and what you're going to learn.

After all, there are a lot of applications that are useless in school life.

ASSISTANT BOARD can display not only the scores from mock exams, but also those from regular school exams as well as other grades.

You can bring your grades anywhere and work on improving your academic skills.

## Why did we create ASSISTANT BOARD? Here's what we've been working towards since before COVID-19 infection.

### More "convenient" and "easy to use" functions from the students' point of view

**Centralized information**

No more switching between departmental tabs. From departmental announcements to school flyers, you can see everything in one tab. User information includes built-in subject selections and grades, so you can see everything in one tab.

Oh, today was assignment submission day! This is often the case, isn't it? To avoid such carelessness, there is a notification function for assignments. When the deadline for submission is approaching, you will receive a push notification to let you know.

**Convenient notifications**

### Our goal is to create an app that "assist you" in your school life

How is this application useful in school life?

**Paperless**

With ASSISTANT BOARD, there is no need to print out or even gather people to distribute the information. With a single tap, you can send as much information as you need.

As a more convenient application, Assistant Board can promote the use of ICT devices in educational institutions, enabling them to adapt to the new era, such as Society 5.0 and 5G.

**Promoting ICT**
