Sorting and Saving Energy

What can we do right now?

Chigusa high school

Purpose of this presentation

- Innovations for fighting climate
- Finding the way to stop the climate change
- Raise awareness

Sorting and Saving Energy

What is happening right now?

- NOT sorting in a right way
- Don't know how to sort
- Throwing away the trash in the place that shouldn't
- Too many trash that we can't keep up with
- It is bothered some.
- Using too much energy
- Don't know how difficult situation it is now

Sorting

How we can solve these problems?

- Increase trash can
- Use “my straw”
- Bring your own bag
- Reduce trash
- Eliminate waste and do not use extra resources

Saving Energy

How we can solve these problems?

- Change old home appliances to new one
- Increase the gasoline tax
- Turn off the lights if nobody is there
- Use train or bicycle instead of car
- Don't set the temperature extreme

Sorting and Saving Energy

Cons

- Recycling is difficult
- Wasting too much plastic
- Need a lot resources
- Cost a lot
- Producing CO₂
- Using too much energy

Pros

- The effect of reducing CO₂ is enhanced
- Can suppressed global warming
- Can protect resources
- Can save the energy
- Can reuse, recycle, and reduce the resources
- Can be a sustainable society

Sorting and Saving Energy

- Deposit Return System
- Ballot bin

How about more common items?

~Fulfilling daily things~

Thank you
for listing!
