Origin of dance

Dance is the oldest art or communication tool that predates the perfection of language.

Dance is deeply rooted in the history of all ethnic groups, and since not only humans but also other animals dance, it ends up being an essential activity of all living kinds.

1. Physical expression media

-A type of art that expresses emotions beyond the linguistic level.

(Dance is the foundation of art, so much so that it is said to be the mother of art.)

-It becomes a medium for expressing and handing down the culture, history, stories, etc. of the ethnic group.

2. Physical communication media

(The role is to raise morale and share, such as war dances and dances of joy.)

- Interacting with supernatural beings through physical communication. (It is classified as a sacred dance. It is danced by the gods that the people believe in.)

In modern times, dance (modern dance) enriches people's lives.
However, one aspect of dance as a communication medium like the past has been lost.
