

Crowds in Classroom

~Educational problems in developing countries ~

W201906-2
Ichikawa Senior High School

So many children in one
classroom

- Hot
- Risk of Covid 19
- Students can't hear teacher's words
etc

To solve these problems ...

- Building schools
- Hiring more teachers

**Difficult
Need a lot of
money**

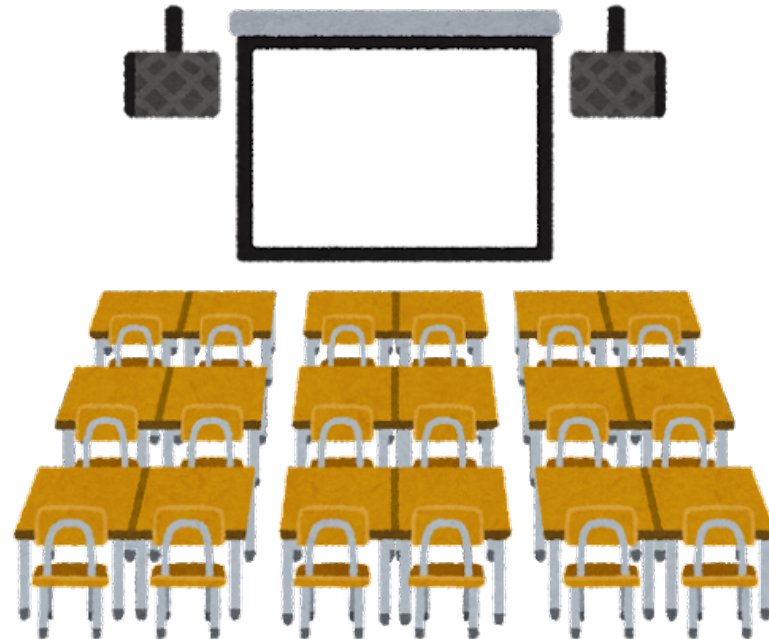

How about...?

- Equip a projector in the classroom
- Gather people who are eager to educate children all around the world

By doing so...

- Students don't have to gather in cramped spaces
- Able to control the volume

For people who teach them...

- gain opportunity to share knowledge
- have interaction with children living in another countries
