

Protect women in evacuation centers by introducing changing rooms “MAMORU~MU”

from Yokohama Municipal
Minami High School

SGHN042

Trigger

- Natural disasters are familiar to people in Japan
- Evacuation centers provide little protection of people's privacy
- Some crimes occur and people feel stress and anxiety
- ➔ We should solve these problems in evacuation centers

“MAMORU~MU” is...

easy foldable room that evacuees can use for changing clothes and breastfeeding
➔ so that we can reduce evacuees' burden by ensuring their privacy and preventing crime

Purpose

- Prevent crime and reduce people's mental burden

Prototype

At first...

We were going to make this product with cardboard

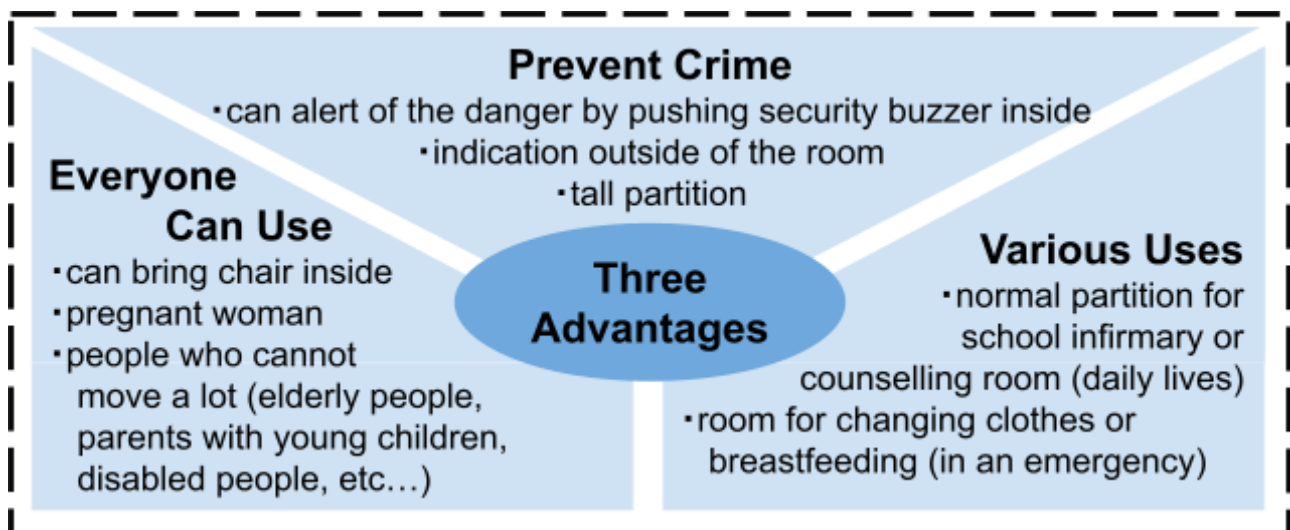

However...

We made a prototype and realized that cardboard lacks strength and originality

Then

Found a great material !

Recycled fiberboard made from discarded clothing
➔ strong, ecofriendly, unique

outline

Make MAMORU~MU with fiberboard

Store it on school infirmary, counselling room, etc
