

# The need for basic income

Would you bet the future of Japan on it?

Takehuhigashi high school

## Problem

Happiness level is decreasing

## Hypothesis

The difference between rich and poor is involved

- In countries with low levels of happiness, there is a gap between rich and poor
- The opposite is true in countries where the gap between rich and poor is small.

## Solution

## Basic income

### Merit

1. Poverty Reduction.
2. Labor Market Flexibility.
3. Social stability.

### Disadvantages

1. Fiscal burden.
2. Impact on the Labor Market
3. Setting the Exact Amount.

## Experiment

- 👍 Kenya  
The child was given an education  
hunger alleviated
- 👎 The country went into deficit
- 👍 Finland  
Happiness increased
- 👎 People's motivation to work has decreased

## Conclusion

**Basic income is necessary for Japan to steadily grow.**

First, Japan should also conduct social experiments.

in Japan's case

- Declining birthrate and aging population
- Low birth rate
- weaker yen Inflation
- Job placement using AI
