

Infectious disease control countermeasures

Prevent with soap and hand washing

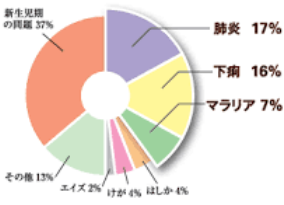

Wakayama shin-ai high school

Introduction

Today, people in developing countries suffer from various diseases. And most of them can be cured and prevented. So, our plan is to make soap and recognize symptoms of infections and send them to Chad and Cambodia.

■世界の5歳未満児の死亡原因■

← Causes of death for children under 5 years old

Pneumonia, diarrhea and malaria account for 40% of the death of children under 5 years old.

Effects of hand washing →

What is soap nuts called "Mukuroji"?

It's becomes the source of natural soap. It has much Saponins on it's skin. Also, It's can be gotten in Cambodia and South Africa.

Activities

We made a videos and posters to call for infectious disease prevention.

• X-ray of lungs

Healthy lungs vs. Lungs of a person infected with pneumonia (like spiderwebs)

• CT of lungs

like a honey combs

Future outlook

- ① Sending videos to Chad and Cambodia, where there are branches of the Society of Jesus, which is the parent organization of our school.
- ② Calling out to organizations active in these countries
- ③ Transmission on SNS.
