

THE FUTURE USAGE OF ICT IN EDUCATION

Tokyo Metropolitan Tachikawa Kokusai Secondary Education School

4 QUALITY EDUCATION

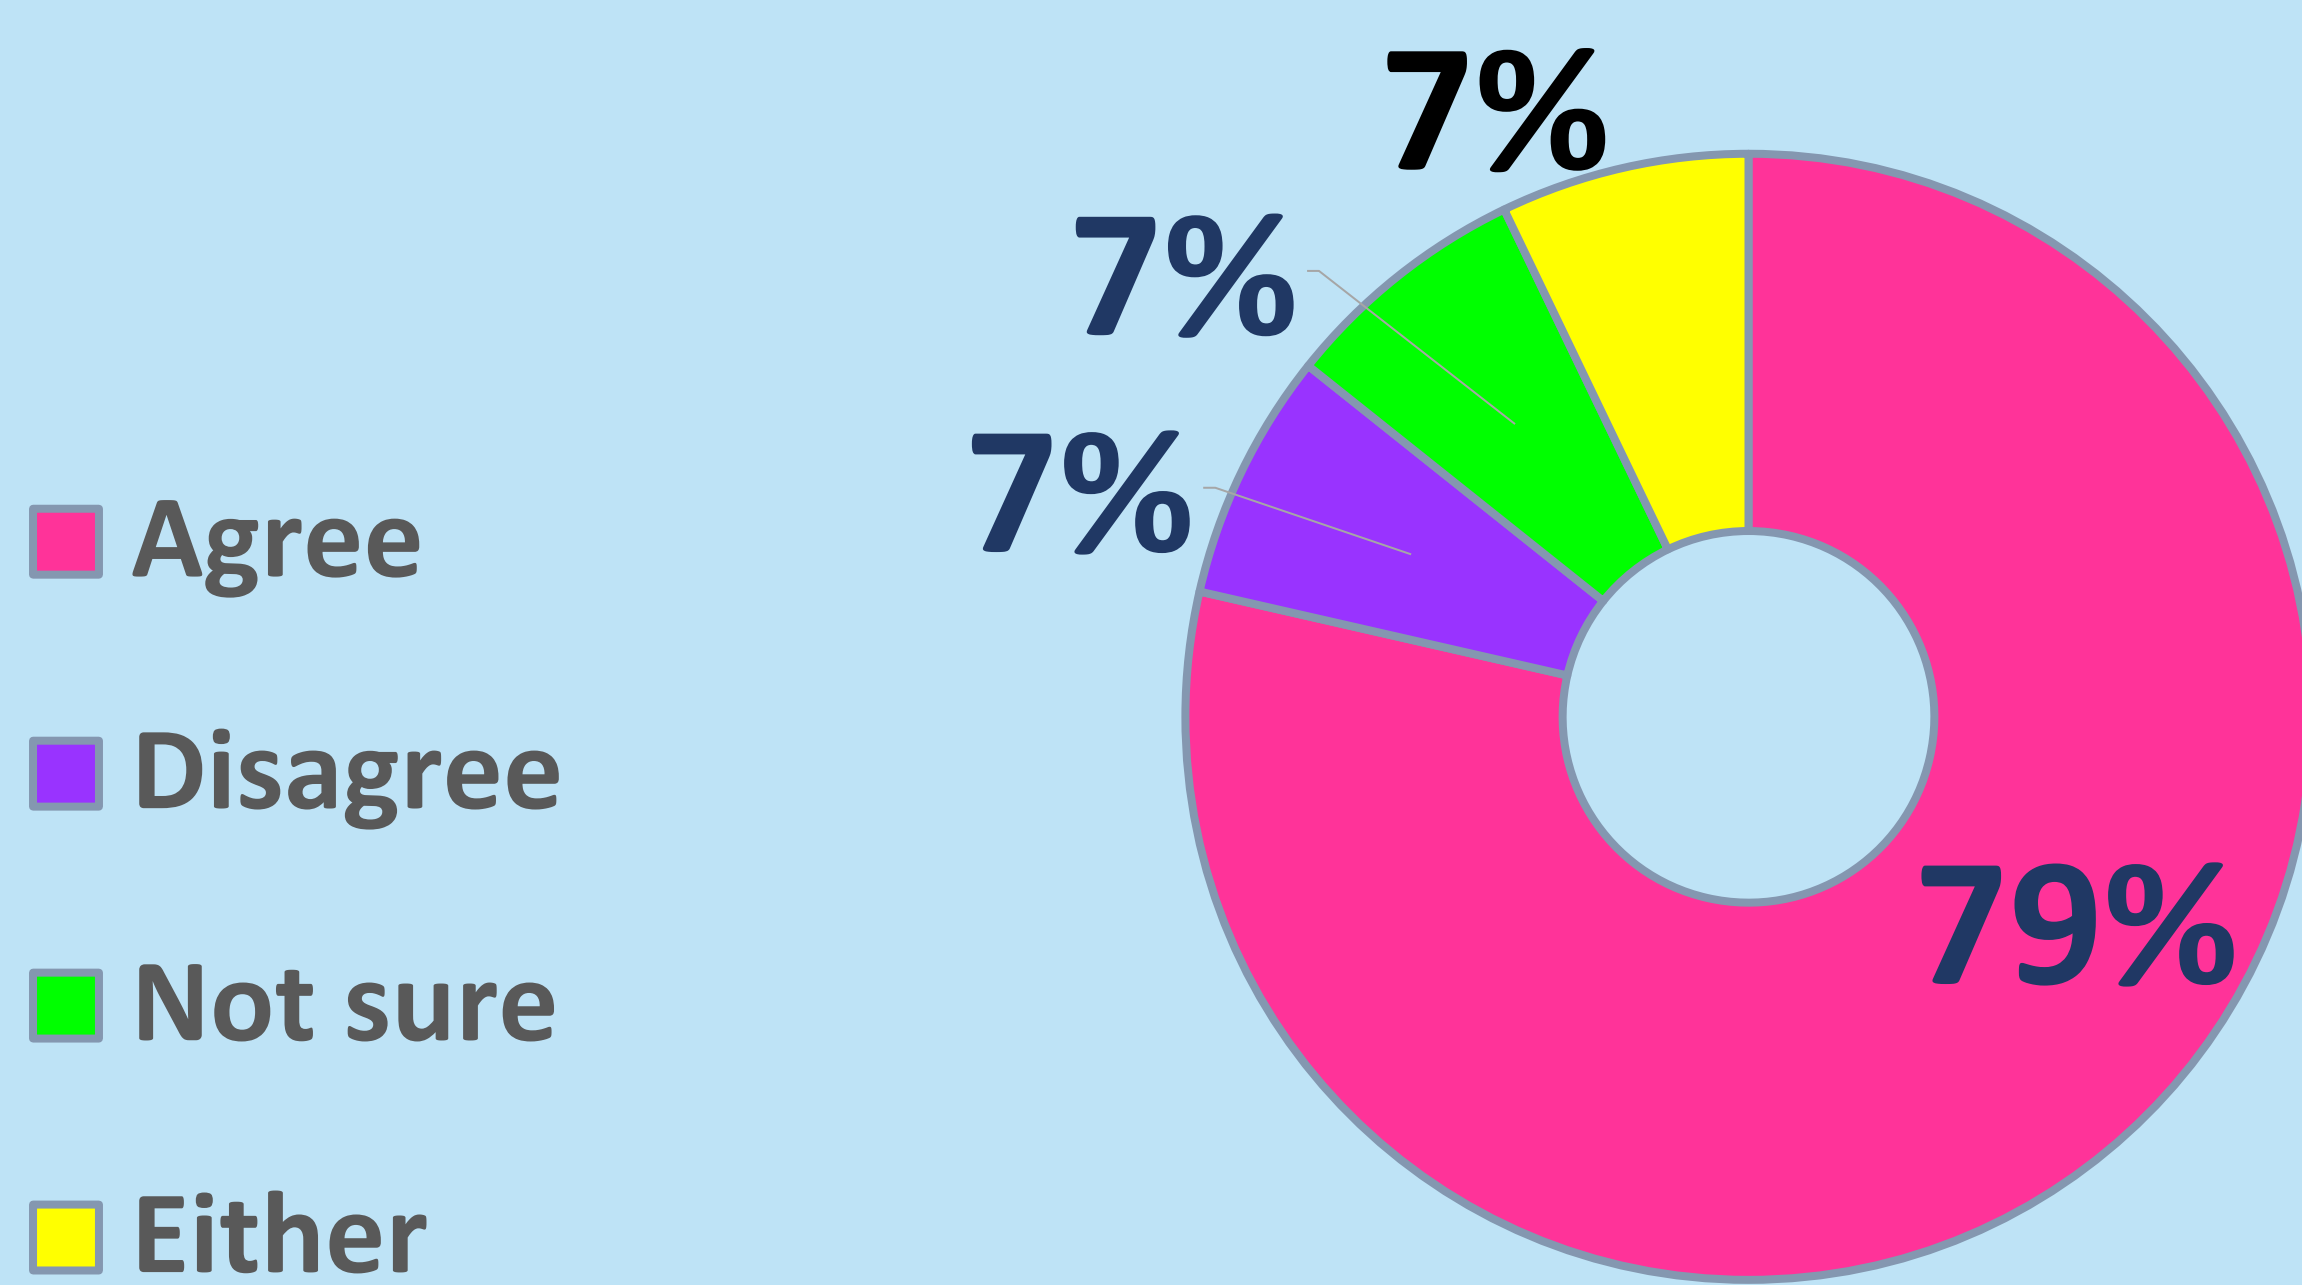

Internet Communication Technology (ICT) has recently been installed in educational institutions around the world. In today's information society, we need to understand how ICT affects our learning.

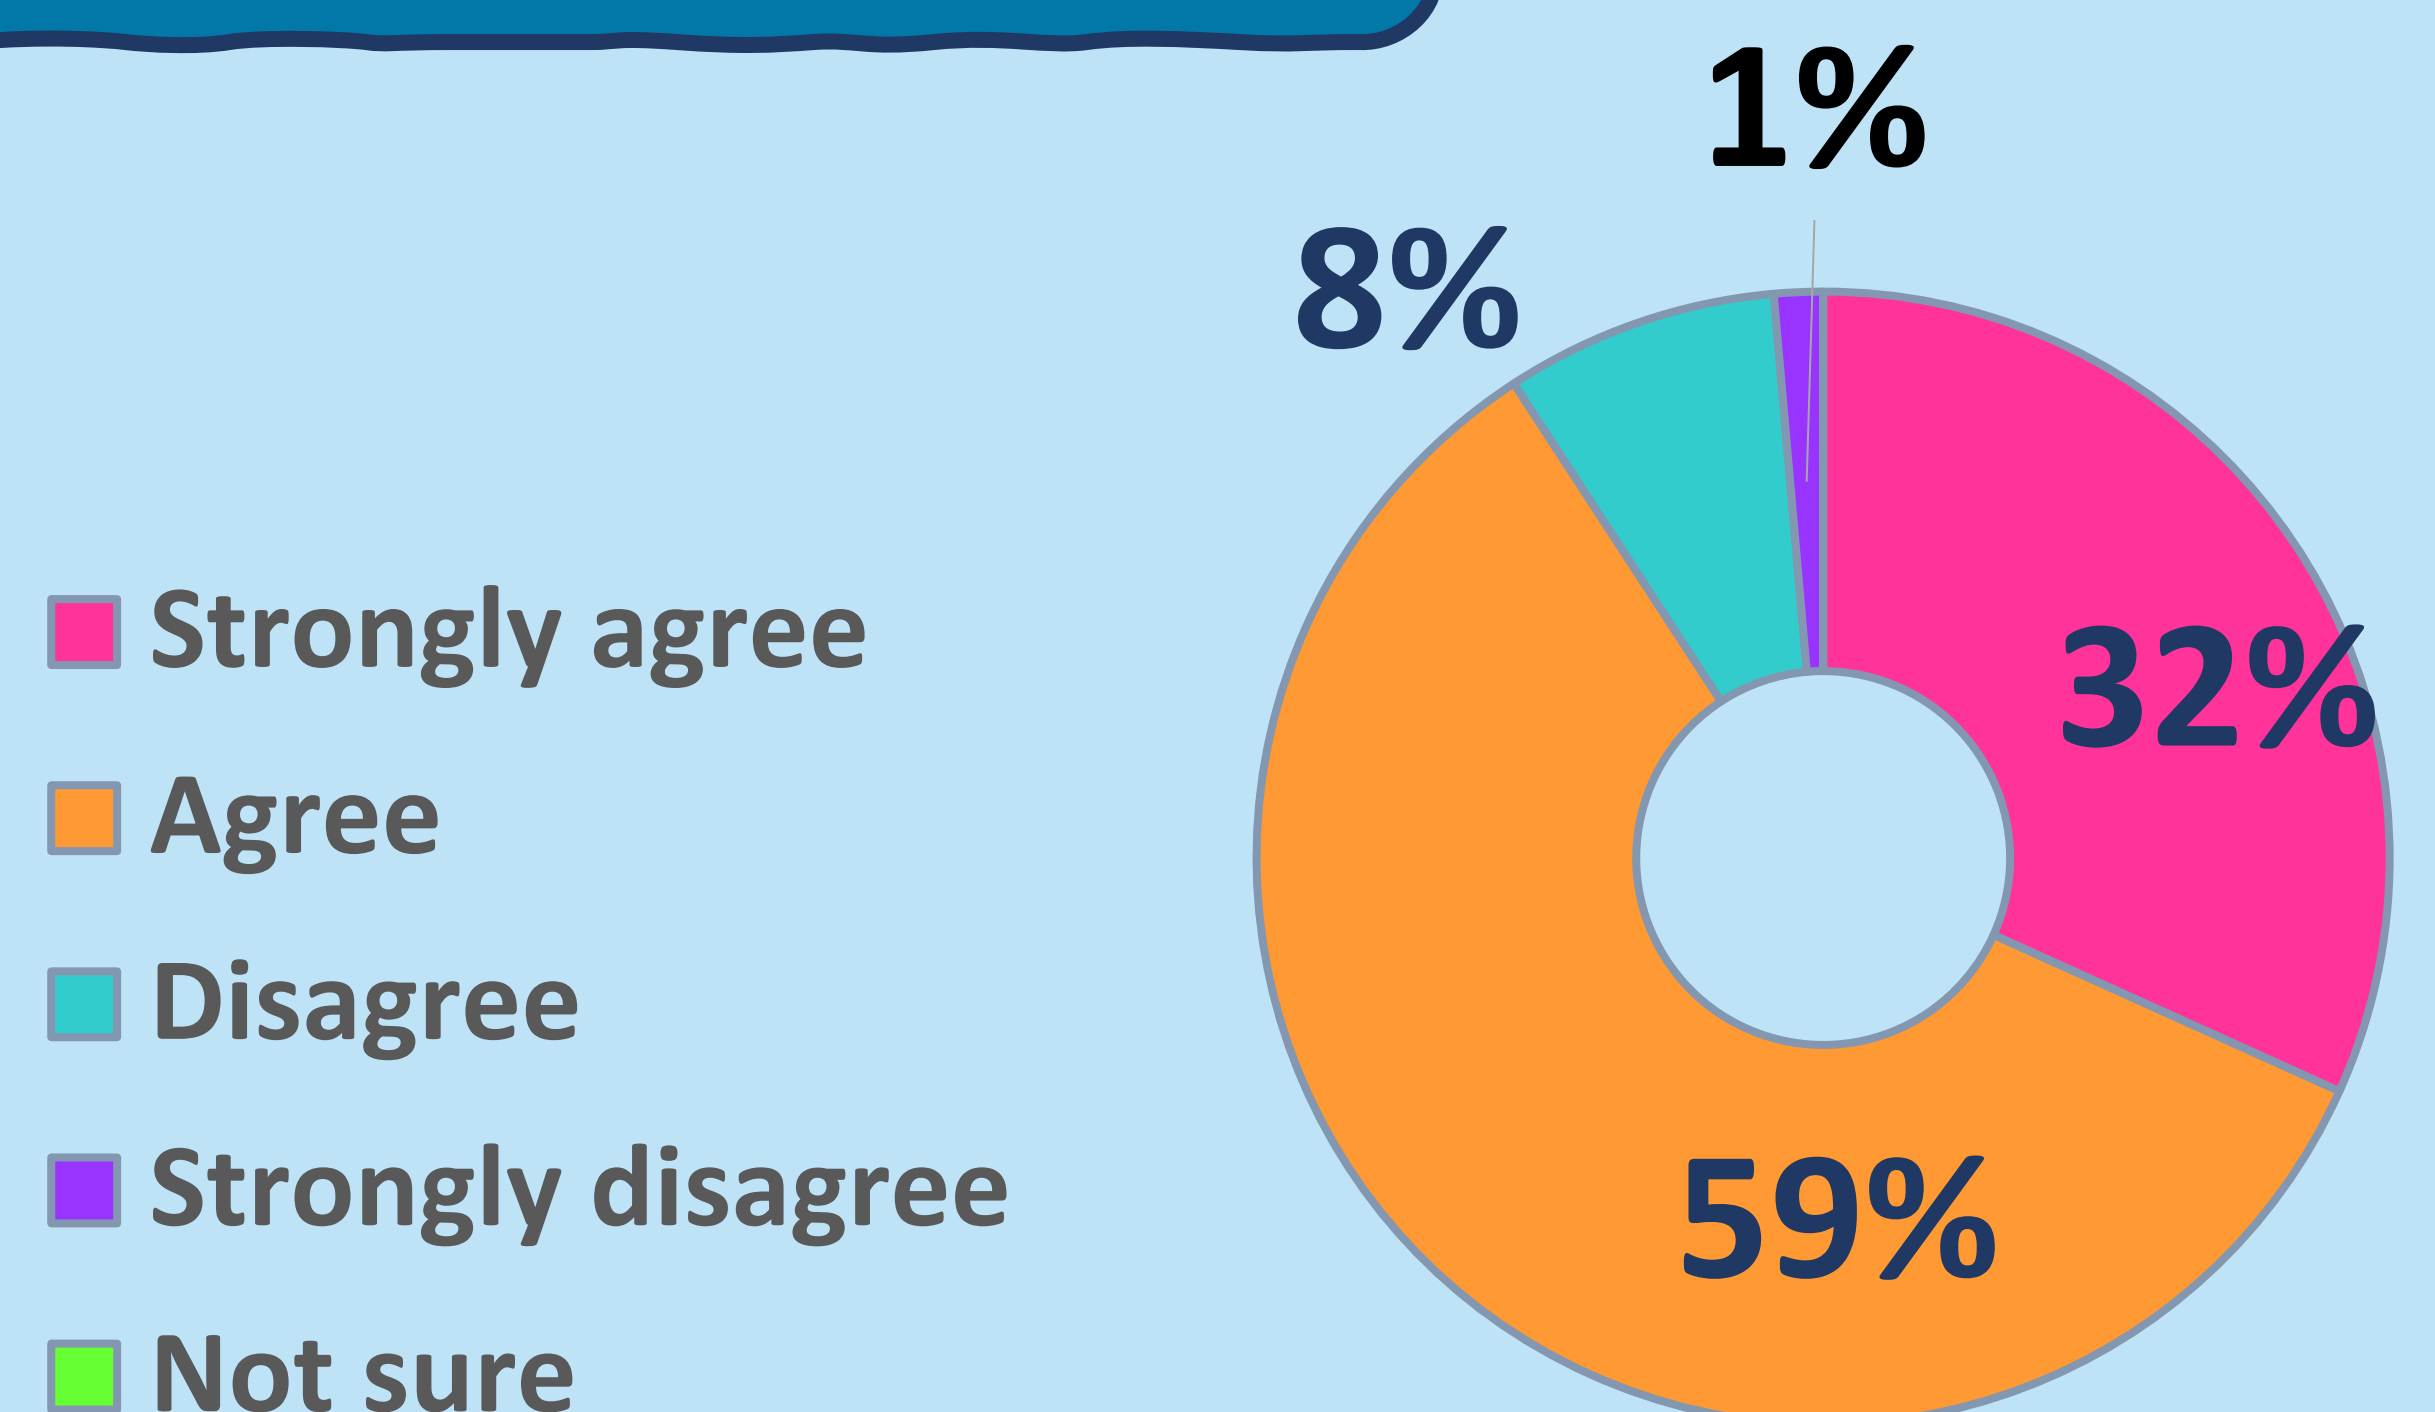

LET'S USE DIGITAL EDUCATIONAL TOOLS!

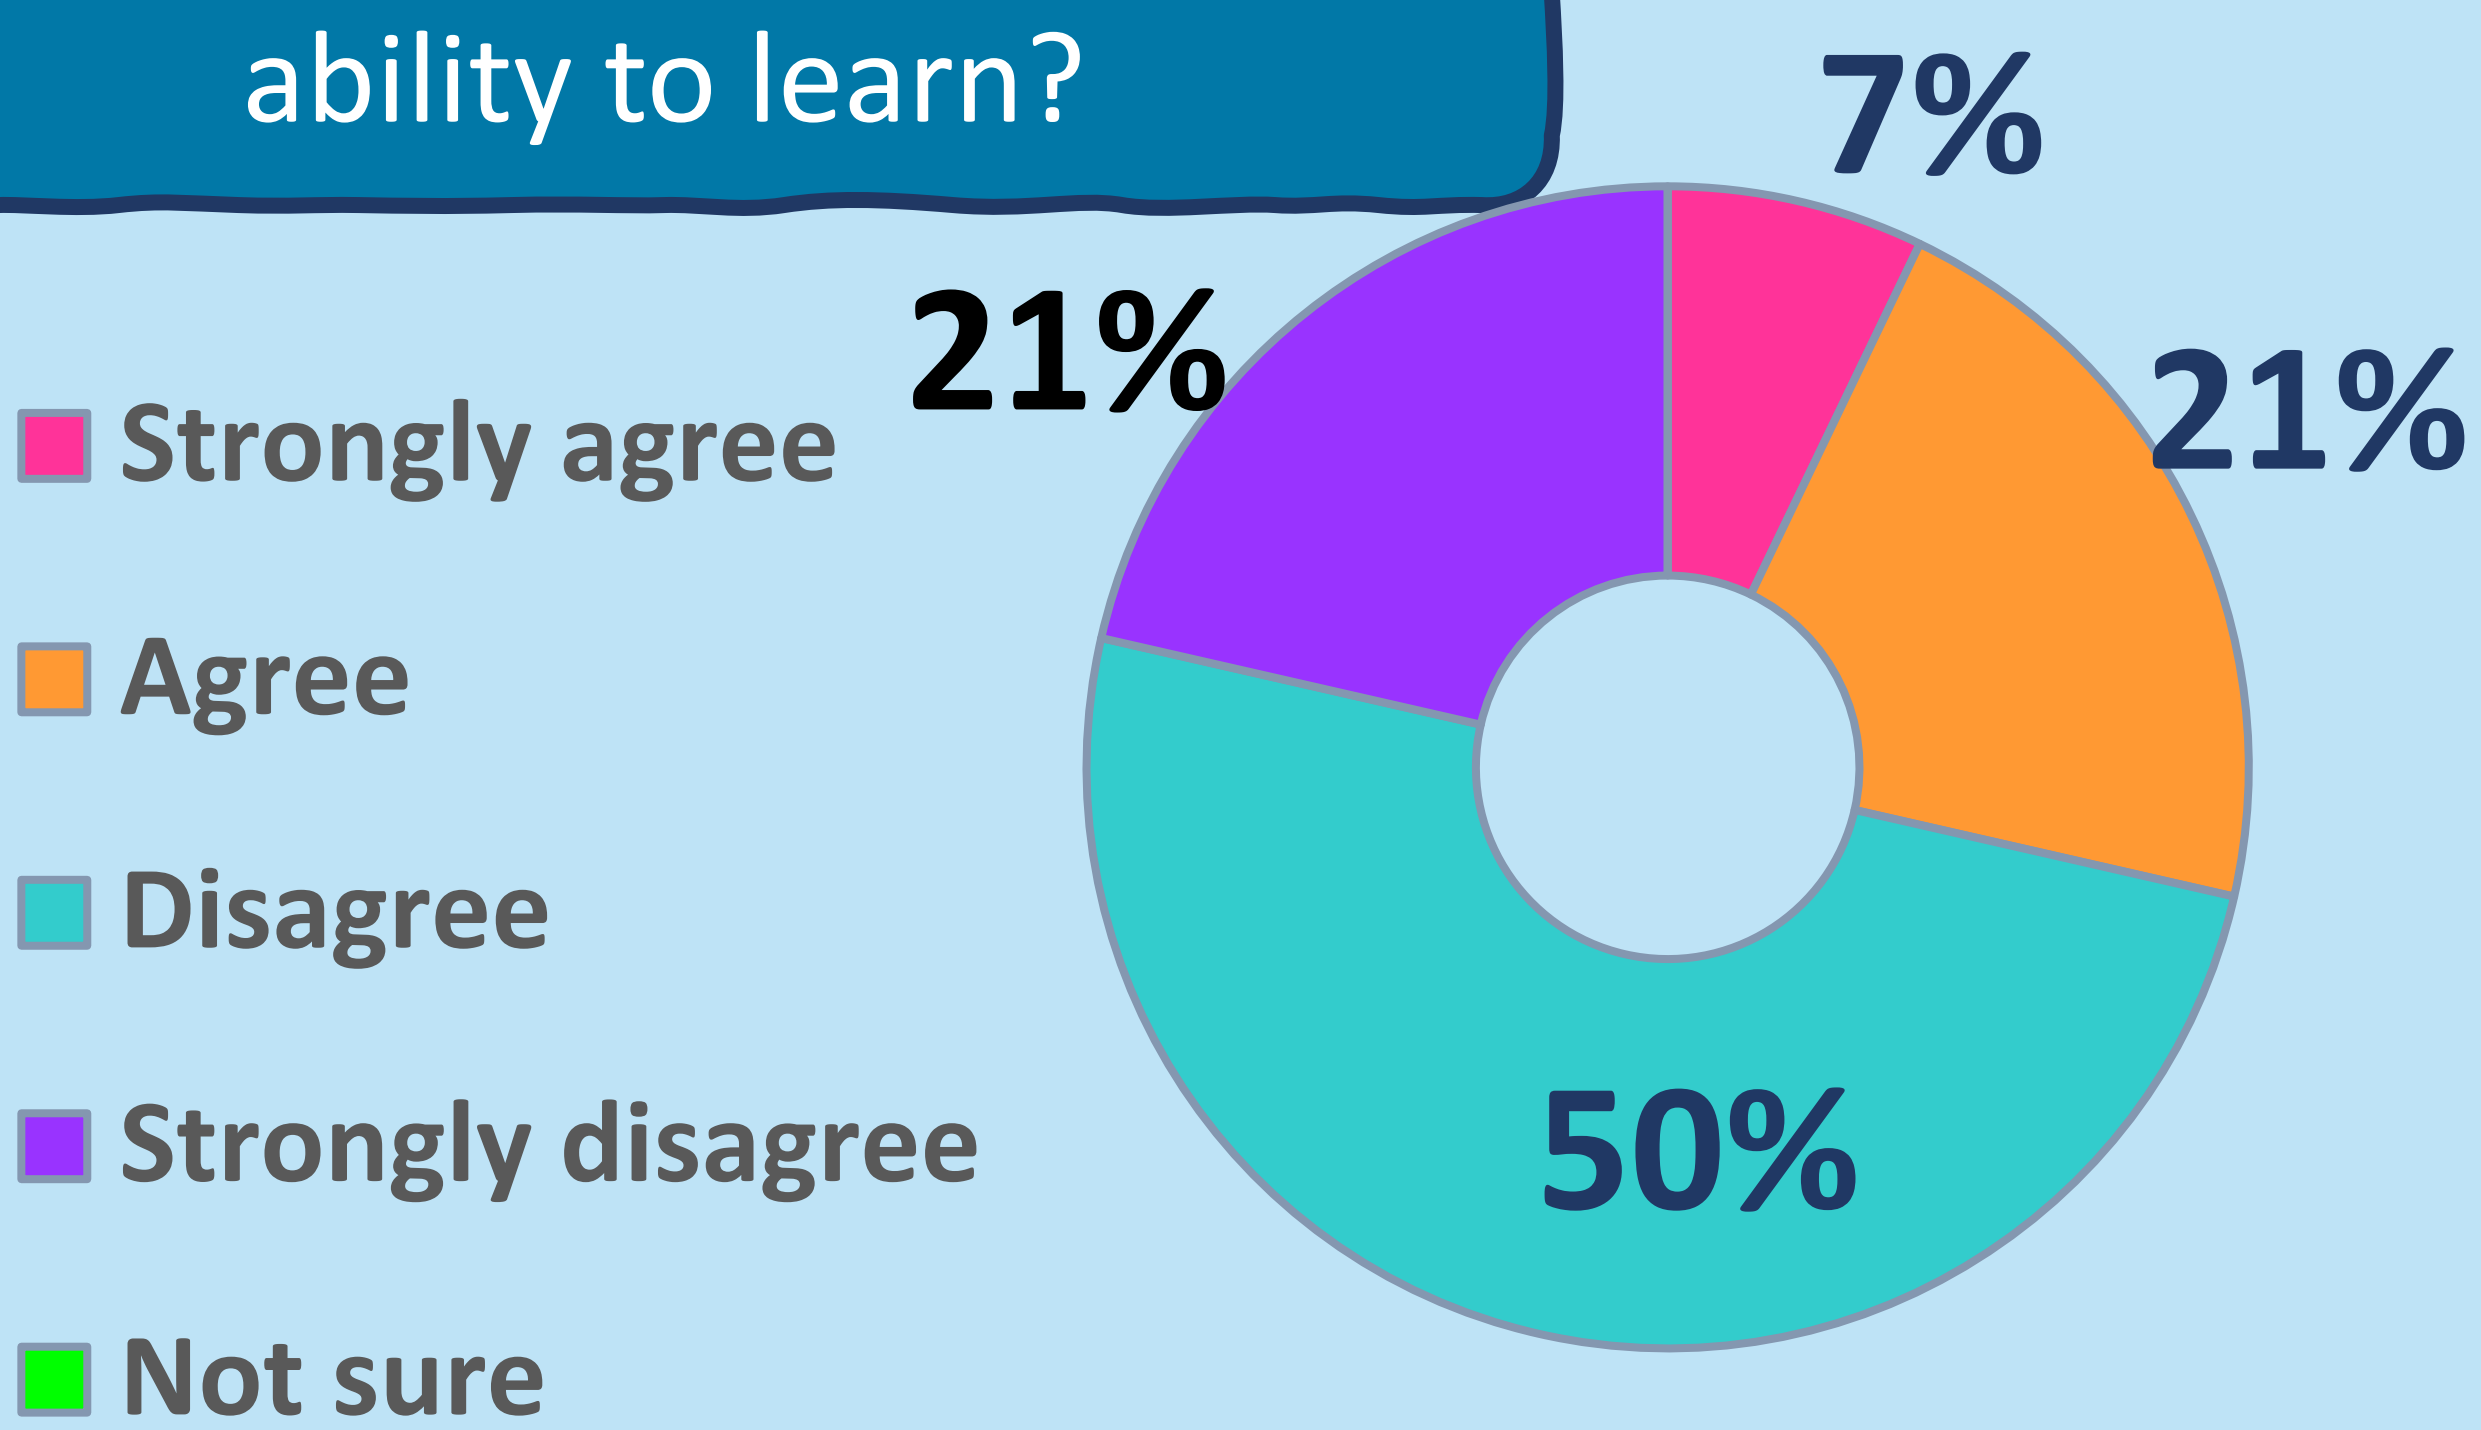

Do teachers think ICTs are effective for students' learning?

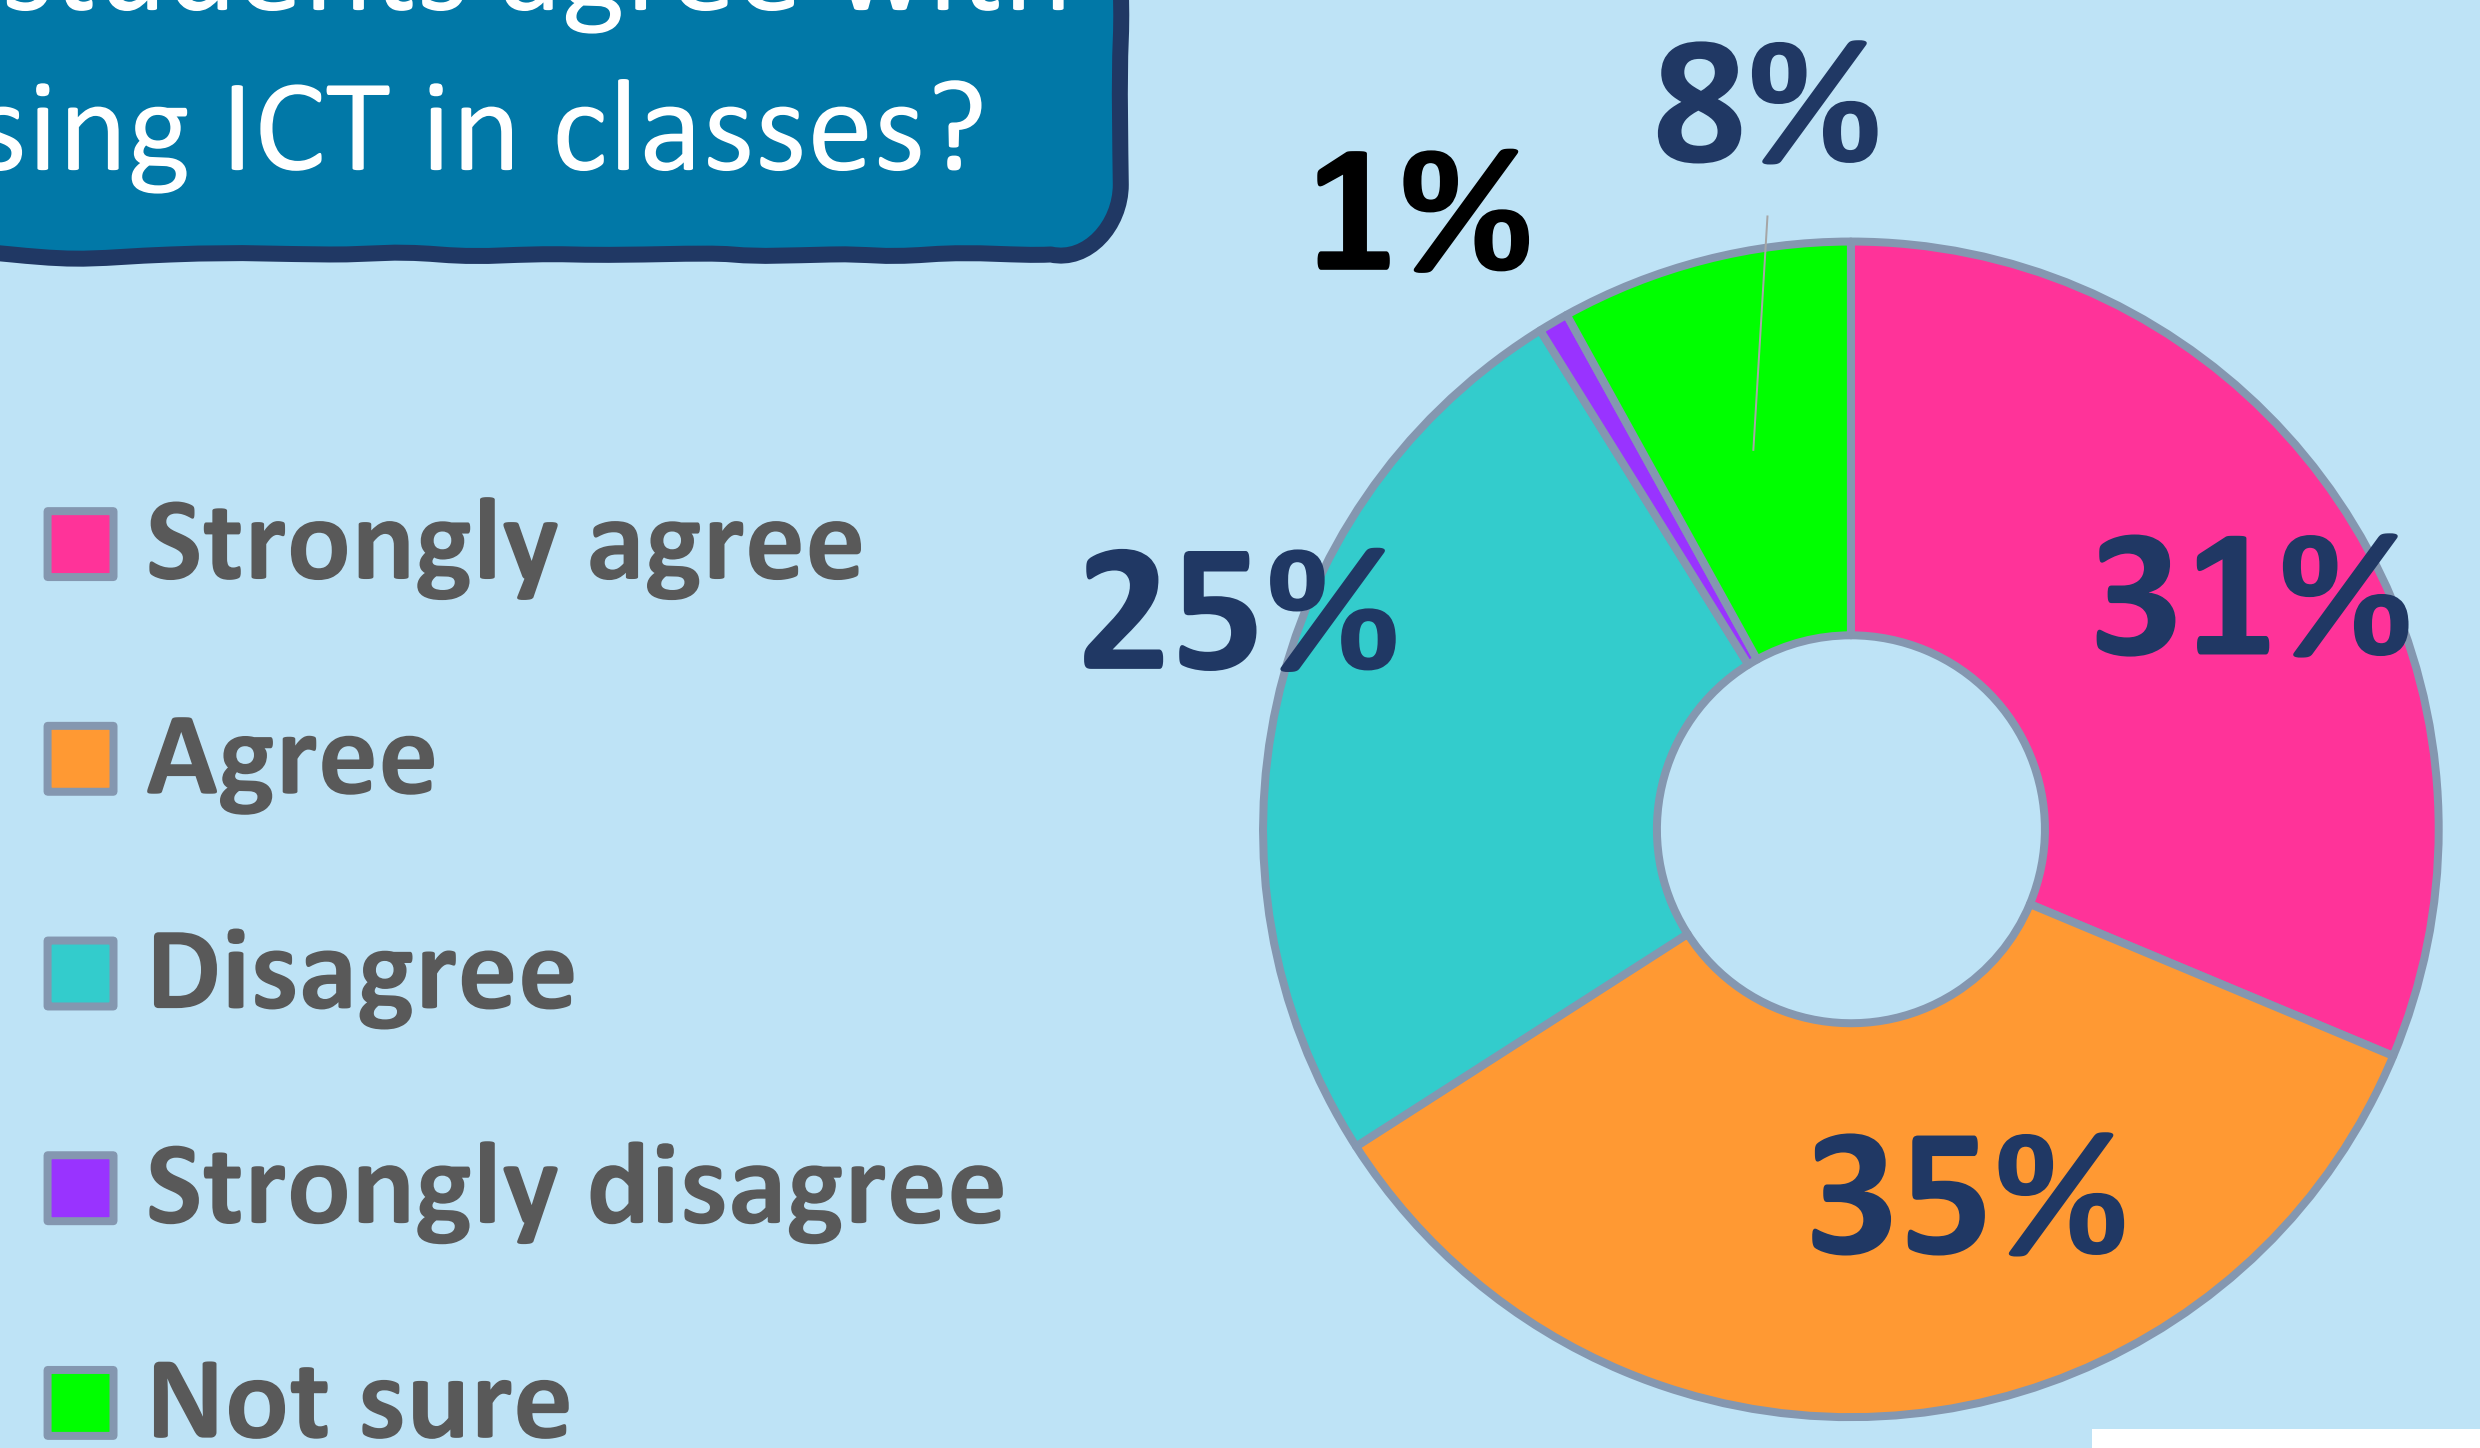

Do students think their school laptops are useful for learning?

Do teachers think ICT reduces ability to learn?

Do students agree with using ICT in classes?

Reduce the amount of baggage

Big screen

Go paperless

Easy to share students' opinions

Easy to research

Learn with sounds and videos

Streamlining

More survey results here

Problems

-too heavy baggage

-can be distracted

CREATE A NEW APP

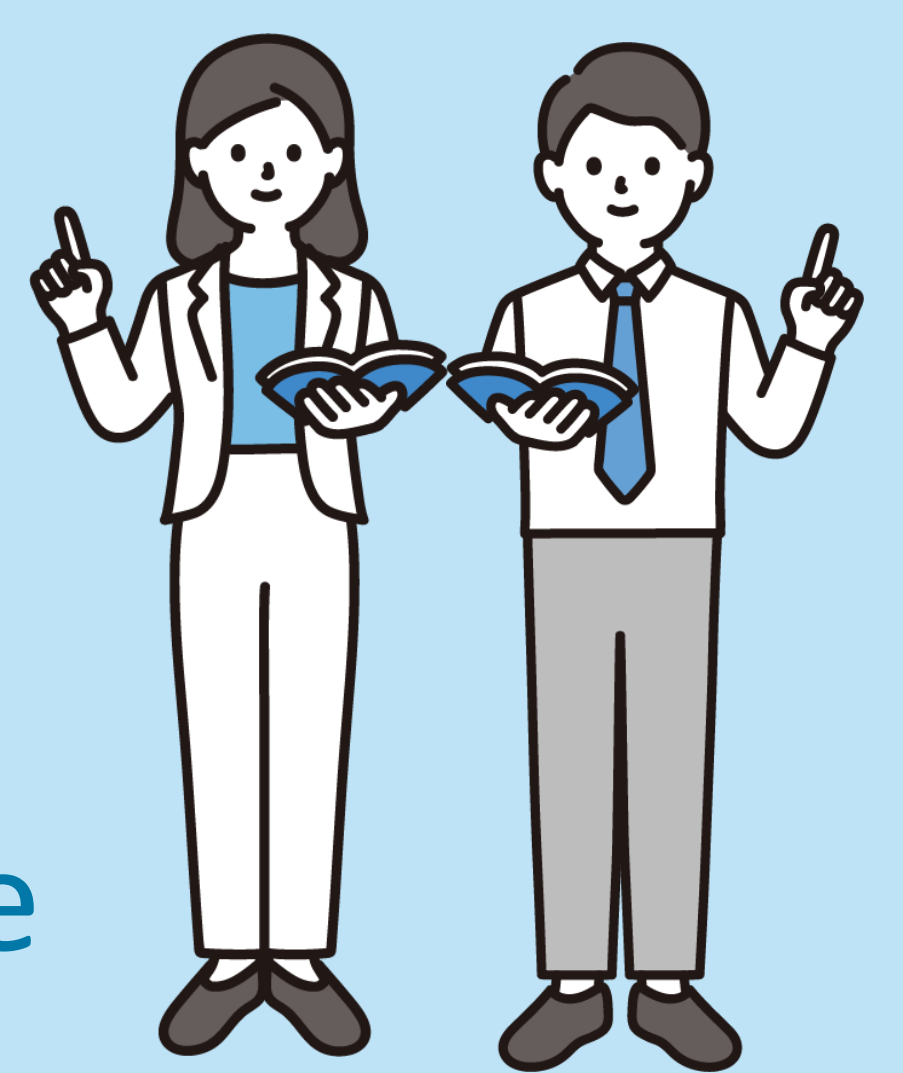

students

submit assignments

Digital textbooks
