Introduction to the World Giving Index

147,186 people were surveyed by Gallup in 2022

142 countries from around the world are ranked in the index

2 million+ people that were included in the research since 2009

How you donated money to a charity?
Have you helped a stranger or someone you didn't know who needed help?
Have you volunteered your time to an organisation?

As well as collecting key demographics and social attitudes we asked 3 key questions about what people had done in the past year.

An average of the positive responses is calculated for each country, giving an index score and global ranking. A higher score indicates that more of the population is engaged with giving. The lowest possible score is zero and the highest possible score is 100.
