Nagano Prefectural Matsumoto Agatagaoka Senior High School

01	Background	02	Hypothesis
<p>When I was a junior high school student, I noticed that classmates were highly motivated during English lessons through sharing opinions with friends and receiving advice from teachers. I realized that lessons are similar to <u>Finnish education which values dialectic and collaboration</u>.</p> 		<p>If we apply <u>Finland's dialectic and collaborative approach to education</u>, it would help solve the problem proportion of low motivation toward learning among Japanese students(*1)?</p>  <p>(*) Source:Joint Reserch Project by University of Tokyo Insitute of Social Science and the Bernese Educational Reserch and Development Insitute</p>
