卵かけご飯をすべての人にプロジェクト

「誰もが食事を楽しめる世界を作る」これが私たちのゴールだ。食事の楽しみは食べるだけでなく「作ること」にもある。しかし、身体の不自由な方や小さな子供たちは作ることが難しい。自分で作ったという達成感を味わえ、挑戦や失敗さえも楽しめるようにしたいと考えた。そのために、調理過程を全自動にするのではなく、自分でできることを最大限に活かせる器具を開発している。その第一歩として、卵を割る自助具を製作した。

Project of "Egg Dishes for Everyone"

Our goal is to create a world where everyone can enjoy meals. The pleasure of meals is not only in eating them but also in "making" them. However, some people, such as those with physical disabilities or small children, can find cooking difficult. We cherish the sense of accomplishment that comes from making something by ourselves, and enjoy the entire process of cooking, even the challenges and failures. Therefore, instead of fully automating the cooking process, we are developing utensils that maximize what people can do on their own. As a first step, we have created an assistive device for cracking eggs open.

高校生の力を地域へ：地域の力を高めるボランティア連携システムの提案

人口減少が進む典型的な日本の地方都市である宇和島市ですが、地域を支える活動に参加したいと考える高校生が数多くいることに気づきました。そこで、本校だけにとどまらず、他校の生徒とも連携したボランティアネットワークを作り、高校生が地域人材として様々な分野で活躍すれば、地域に活力を与えられるのではないかと考え、高校生の力を引き出しながら、困難に対応できる地域づくりを目指すシステムを研究します。

Connecting High School Volunteers: A System for Community Empowerment

Uwajima City, our hometown, is a typical regional city in Japan facing a decline in population. We noticed that many high school students are eager to take part in activities that support the local community. Therefore, we conducted a study to establish a volunteer network involving students not only from our school but also from others. Through this network, we aim to empower students and help build a more resilient local community.
