

Take Action and Make a Change

From Our School to Global Impact

Senior High School Attached to Kyoto University of Education

Glocal Social Action is a team of eight students that launched in 2025 and is officially recognized by our school, dedicated to creating a society where everyone is respected and safe. We are working on these two projects:

Problems that Foreign Tourists Face

1. Background

Many foreign tourists visit Kyoto, but they sometimes feel inconvenienced, and local people also have more problems. We wanted to help solve these problems

2. Research method

We did a street interview with foreign tourists at Kiyomizu temple and Fushimi Inari shrine. We talked to 12 foreign tourists.

3. Result and Solution

01

There are few trash cans.

⇒ We will make a map showing where trash cans are located.

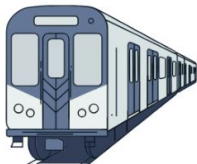

02

that the subway is very crowded.

⇒ We will create a map of less crowded train routes to tourist spots.

It will also introduce "secret spots" to help spread out tourists.

4. Future prospects

- ① Create maps showing where trash cans are to reduce littering.
- ② Introduce less crowded tourist routes to ease subway congestion.
- ③ Aim to create a town where both tourists and locals can enjoy their time comfortably.

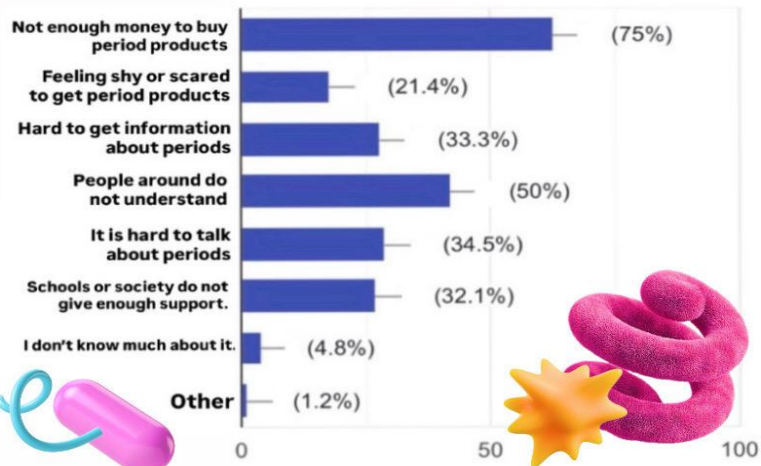

PERIOD POVERTY

Menstrual poverty is not only about products. It is about lack of support, understanding, and information.

What do you think of when you hear "period poverty"?
(You can choose more than one.)

Survey results at our school

Period poverty ≠ only a money problem; it is also about understanding.

Our Future Activities

- ① Place boxes at the elementary and junior high schools
- ② Students can write their worries about periods and put them in the boxes
- ③ High school students answer the worries using pamphlets

Make periods more familiar.
